Project Description:

Landscape services were secured via EMG Management Group on behalf of East Point Condo Association Board for redesign of the existing site landscape. The site contains 7 individual office buildings (5 multi-storied) as well as several parking lot landscape islands. The existing landscape, as of 2013, primarily suffers from the use of the “wrong plants in the wrong places”. PLA was retained to recommend new plant material selections that are low-maintenance, energy-efficient, salt-tolerant and of course attractive.
