COMPLETION
 Design: 2013

Project Description:

PLA was asked to provide landscape planting design for a brand new home in the Hamburg area of Lexington, KY. The site contained some serious constraints including 3-6' side yards and very minimal front and back yards. Plant materials were selected to fit the size of the lot without blocking the view from inside the home or yard and to add significant screening of some of the neighboring properties. Seasonal color and interest was factored in to enhance the property year-round.
